

3.3. COMPONENTS & FUNCTION DESCRIPTION

3.3.1. UPRIGHT MODEL

4.7.3. MAIN POWER CONNECTIONS

When the power supply is checked and the unit is earthed, you can switch on the unit.

4.7.4. CO₂ / LN₂ BACK UP

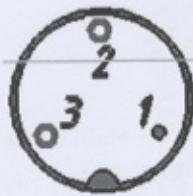

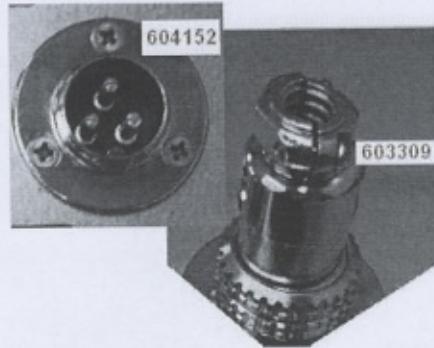

The CO₂ / LN₂ BACK UP is a 24Vdc connector to activate the corresponding CO₂ or LN₂ valves.

The CO₂ and LN₂ Backup accessories include the cable from the CO₂/LN₂ BACK UP connector to the valve.

4.7.5. REMOTE ALARM

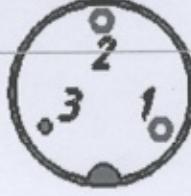

The remote alarm is a volt free dry contact which will alarm in case of any alarm is activated.

Male and female alarm plug

2-COM
3-NO
1-NC

Normal Conditions

2-COM
3-NO
1-NC

Alarm Conditions

In normal conditions, the relay is always open which means connection between COM and NO (normally open). In case of alarm, the relay is closed which means connection between COM and NC (normally closed).

During the first start-up of the freezer the alarms will be de-activated until the temperature set point has been reached.

For the remote alarm contact there is a time delay, by default this delay is programmed to 10 minutes.

4.7.6. RS485 PORT

The RS485 Port can be used to monitor parameters and alarms on your PC by using the Telstar software and a RS485 to RS232 cable with converter.
