UNIVERSITY OF SZEGED

REGULATIONS GOVERNING THE DOCTORAL TRAINING PROGRAMMES AND THE AWARDING OF THE DOCTORAL DEGREE

Szeged, 28 November 2016
The Senate of the University of Szeged in compliance with Act CCIV of 2011 on National Higher Education (NHEA) and Government Decree (GD) 387/2012 (XII.19.) on Doctoral Schools, doctoral procedure, and habilitation, sets forth the following regulations on the doctoral training programmes and the procedure to obtain a doctoral degree. (In these Regulations citations from the National Legislation appear in italics.)

PhD/DLA students and doctoral candidates who started their doctoral training programmes or the procedures for obtaining a doctoral degree before 1 September 2016 shall fall under the rules pursuant to the provisions of the regulations entering into force on 1 January 2016.

NHEA. Section 16
(1) The PhD course forms part of the education programme which prepares candidates to obtain a PhD during the PhD programme following completion of the Master’s degree programme. At least two hundred and forty credits shall be obtained in the PhD programme. The training period shall consist of eight semesters – unless otherwise provided by law.
(2) Higher education institutions in which Master’s degree programmes are provided in the given discipline may obtain authorization to offer a PhD programme.
(3) The higher education institution may obtain authorization for offering PhD programmes and awarding PhDs in disciplines or branches of science and art, the institution is licensed to operate in. Authorization may be obtained for PhD programmes awarding PhDs in the field of art, as well as DLA programmes awarding the artistic title of “Doctor of Liberal Arts” (hereinafter PhD programmes).
(4) “Doctor of Philosophy” (abbreviated as PhD) is the academic degree certified by a diploma which may be obtained by completing a PhD programme. The Rector and the president of the doctoral council shall sign the diploma.

In line with the ruling of The Hungarian Accreditation Committee, The University of Szeged (hereinafter: University) shall be entitled to run doctoral training programmes and award doctoral degrees in all academic disciplines and branches of science that are listed in Appendix 2.

CHAPTER I
THE LEGAL FRAMEWORK

The legal framework for the Doctoral Regulations at the University of Szeged incorporates the following legal Acts and Government Decrees:

- Act CCIV of 2011 on National Higher Education (hereinafter NHEA)
- Government Decree (hereinafter GD) 387/2012 (XII.19.) on Doctoral Schools, doctoral procedure, and habilitation
- Act C of 2001 on the recognition of foreign certificates and degrees
- Government Decree 423/2012 (XII.29) on higher education admission procedure
- The ruling of the Hungarian Accreditation Committee (hereinafter HAC) on the requirements governing the establishment and operation of Doctoral Schools (decision made on a HAC meeting 7 June 2013 (hereinafter HACDEC).

When devising the Doctoral Regulations, the University also considered the following:

- the bylaws of the University and other regulations that govern the doctoral training programmes and the procedure to obtain a doctoral degree. These regulations are displayed in the Appendixes of the bylaws.

Within the framework of these Regulations, the Disciplinary Doctoral Councils (hereinafter DDC) are entitled – in agreement with the relevant Faculty councils – to issue regulations that supplement these Regulations and govern their particular academic discipline.

The Doctoral Regulations are published by the University on its website.
CHAPTER II
GENERAL PROVISIONS

SCOPE OF THE REGULATIONS

1. The effect of these Regulations shall extend to the following:

THE DOCTORAL TRAINING PROGRAMME,

- the procedure to obtain a doctoral degree (PhD) and the awarding of the doctoral degree (PhD),
- awarding the honorary doctor (Doctor Honoris Causa) title,
- the nostrification of foreign academic degrees,
- awarding the doctoral degree with honours (Promotio sub auspiciis praesidentis Rei Publicae),
- doctoral students participating in a doctoral training programme (doctorandus: PhD/DLA students),
- teaching staff and researchers participating in a doctoral programme,
- committee members participating in awarding the doctoral (PhD) degrees.

TERMS

2. The terms used in these Regulations shall be defined as follows:

PhD/DLA student: students participating in a doctoral training programme with the rights and duties stipulated in the Acts governing higher education;

PhD/DLA student status: legal status between PhD/DLA students and a higher education institution. The status is defined by those rights and duties that are stipulated in the Acts governing higher education. The provisions shall apply to both parties. The University shall recognise the student status with a student card and by validation of the card;

doctoral thesis: [NHEA Section 108 (1)] a piece of writing, creation or work whereby the PhD/DLA student demonstrates in the procedure of obtaining the doctoral degree that he is apt to perform an independent research assignment appropriate to the degree requirements;

doctoral degree: an academic degree awarded by the University Doctoral Council (UDC). The degree shall be obtained following a doctoral degree procedure either in the framework of a university organised training programme or through individual preparation;

procedure to obtain a doctoral degree: the period of research work in which the doctoral thesis is written. To be entitled to initiate same, PhD/DLA students shall be required to take a comprehensive examination;

doctoral school: the organised framework of the doctoral training programme which advances the preparation for the academic degree. The Senate shall decide on the establishment of Doctoral Schools and on the launching of a training programme;

teaching staff at the doctoral school: The teaching staff at the Doctoral School shall consist of teaching staff and researchers holding scientific degrees and who – on the recommendation of the Head of the Doctoral School – had been found suitable by the Doctoral Council to pursue lecturing, research and supervisory activities within the Doctoral School;
**doctoral school council:** a panel that meets on a regular basis and assists the work of the Head of the Doctoral School. The members of the panel shall be elected and dismissed in accordance with the institution’s doctoral regulations;

**head of the doctoral school:** Upon recommendation by the majority of the Doctoral School’s core members, the Head of the Doctoral School shall be elected by the Doctoral Council from the professor core members of the Doctoral School, holding the title of ‘Doctor of the Hungarian Academy of Sciences’. The Head shall be appointed by the Rector for a five-year term of office at the most. The appointment may be renewed on several occasions;

**doctoral training:** [NHEA Section 53 (1)] The doctoral training programme shall encompass training, research, and assessment related activities conducted either individually or in groups, tailored to the particular needs of the respective academic discipline and the particular doctoral student. Only students holding a Master’s degree are eligible to participate in doctoral programmes.

**doctoral training/research programme:** training and research group that operates within a Doctoral School in the branch of science that had been defined in the Doctoral School’s founding documents. The group shall meet the specific requirements stipulated in the doctoral regulations and be recognised by the DDC;

**comprehensive examination:** [NHEA Section 53 (4) a)] At the end of the fourth semester, the PhD/DLA student shall take a final examination to close the training/research period and to earn the right to initiate the research/thesis-writing period. It is also a tool to assess and evaluate the candidate’s knowledge acquired in the relevant branch of science;

**doctoral council:** a panel established by the Senate of a higher education institution to organise doctoral programmes and award doctoral degrees. The Doctoral Council shall have the right to make decisions related to doctoral issues. These issues include particularly the following: authorizing training programmes, admissions procedure to the organised training programmes and awarding and revoking a degree. The Doctoral Council shall make sovereign decisions in scientific issues thus any appeal against its decision shall only be formed on the grounds of breach of the doctoral regulations or breach of procedure. Such cases are resolved by the Rector.

**doctoral topic:** the doctoral topic is an area of research for the PhD/DLA students to work on – with the assistance of a supervisor – and acquire skills that enable the student to apply scientific methods, bring about assessable scientific findings and to render proof of the conclusions in scientific publications, lectures, and in the form of a doctoral thesis. The doctoral topic shall be approved by the Doctoral School Council;

**announcer of the doctoral topics:** the announcer of a doctoral topic shall be any members of the teaching staff or researchers with academic degrees whose announced topics are approved by the Doctoral School Councils;

**supervisor of doctoral topics:** the supervisors of the doctoral topics shall be any members of the teaching staff or researchers with academic degrees whose announced topics are approved by the Doctoral School Councils. The supervisors shall responsibly manage and assist the PhD/DLA students with their studies and research work and the doctoral candidates in preparing to obtain an academic degree. To have more than three doctoral candidates at any given time, the supervisor shall need the approval of the relevant DDC.

**doctoral abstract:** the abstract booklet of the doctoral thesis is a comprehensive piece of work designed for the academic public. The booklet collects those scientific conclusions that were reached by the PhD/DLA student and demonstrate that during the procedure to obtain the degree, the candidate had proven to be apt to be awarded an academic degree. The abstract shall
be written in Hungarian and English, or in a foreign language fit for the specific purposes of the given branch of science;

**credit:** [NHEA Section 108 (24)] a measurement unit of the students’ academic work. The credit represents in relation to the lessons or curricular modules the estimated time necessary for the acquisition of a specific body of knowledge and the fulfilment of requirements. One credit equals to 30 lessons in average. The value of the credit, provided that the performance of the student had been accepted, is irrespective of the grades received for the student’s accomplishments;

**research area:** the research area is a field of study that reflects on the scientific framework of the Doctoral School and derives from one or more branches of science. The research area shall give the scope of the particular research activity that sets the backbone of the doctoral programme;

**students financed by the Hungarian state scholarship:** [NHEA Section 108 (26)] students who shall be financed by the Hungarian state scholarship,

**lessons:** within the doctoral programme, in addition to the tutorial sessions, the time spent on research or creative work, carried out in the higher education institution or in an organisation with which the higher education institution has concluded a cooperation agreement, is also recognised as lesson time. With disciplines where research, creative work and preparation is linked to libraries, archives, museums, on-site work or external data collection, a permission is needed to carry out the particular research and creative work. The permission shall describe in detail the particular activity carried out, and shall be undersigned by the supervisor and the Head of the Doctoral School. The supervisor shall certify that the research and creative work time had been completed;

**core members:** may be lecturers or academic researchers employed full time on a contractual basis or as public servants at the relevant higher education institution; professors emeriti of the institution; full-time employed researchers at a research institute cooperating with the relevant higher education institution; scientific advisors; research professors (DScs or members of the Hungarian Academy of Sciences). A core member shall hold a scientific degree of the academic discipline and pursue continuous and high standard scientific activity, shall have already acted as a supervisor of at least one candidate who has been awarded the doctoral degree, and shall undertake supervisory work in the doctoral school.

**branches of science:** defined in the practice of higher education and in line with the training programmes. Branches of science are defined in Appendix 1 in the statement of the Hungarian Academy of Sciences (HAS) as of 27 April 2007. The above-mentioned Appendix 1 is identical to Appendix 1 in these Regulations;

**disciplines of science:** NHEA Section 108 (46) stipulates that there are the following disciplines of science: Humanities, Theology, Agricultural Sciences, Engineering, Medical and Health Sciences, Social Sciences, Natural Sciences and the Arts. These are divided into academic branches of science.

**CHAPTER III**

**THE ORGANISATIONAL FRAMEWORK OF THE DOCTORAL TRAINING PROGRAMME AND THE PROCEDURE TO OBTAIN A DOCTORAL DEGREE**

**Doctoral Councils**

*NHEA Section 16*
(5) The doctoral council of the higher education institution has the right to organise PhD programmes and award PhDs (hereinafter doctoral procedure). The doctoral council of the institution may set up academic and art doctoral councils in each discipline, as well as in branches of science and art defined in the doctoral regulation of the higher education institution. With the exception of PhD students, every member of the doctoral council must hold an academic degree.

1. By disciplines of science there are four Doctoral Councils (DDCs) at the University: Humanities, Medical and Pharmaceutical Sciences, Social Sciences, Natural and Engineering Sciences. Also, there is one University Doctoral Council (UDC). Except for the representatives of the PhD/DLA students, members of a Council shall only be professionals with academic degrees.

2. Representatives of the PhD/DLA students who sit in the Doctoral Council shall not be present at procedures where decisions are made to award or revoke doctoral degrees or at voting procedures on the proposed revocation of a degree.

3. Unless regulations or legislation stipulate otherwise, both the UDC and the DDCs, with a quorum, shall usually make their decisions with a unanimous vote of more than half of the members present (simple majority).

4. If the UDC and the DDCs practice their rights to decide, approve, express their opinion and make suggestions regarding personnel issues, unless regulations or legislation stipulate otherwise, a majority of all valid votes cast are necessary to make decisions. The UDC and the DDCs practice these rights secretly (secret ballot). At a secret ballot only a yes or no vote shall be cast.

THE UNIVERSITY DOCTORAL COUNCIL

5. At the University the UDC shall be the principal ruling body that governs the doctoral training programme and the procedure to obtain a doctoral degree.

6. Upon the proposal of the Rector, the Chair of the UDC – a member of the Hungarian Academy of Sciences, a professor and a core member of one of the Doctoral Schools – shall be elected by the Senate for three years. The Rector shall make his proposal with regard to the opinion of the UDC. The mandate of the Chair may be extended for the period of one year.

7. The secretarial duties of the UDC are fulfilled by a member of the staff from the Doctoral Institute. The staff member shall have an academic degree.

8. Members of the UDC:
   a) one representative of each of the accredited Doctoral Schools at the University (these schools are listed in Appendix 2).
   b) with regard to their position: the University's Vice-Dean in charge of Scientific Affairs, the Chair and secretary of the UDC, the Chairs of each Doctoral Councils and the former Chair of the UDC,
   c) a member of the teaching staff or a researcher with an academic degree who shall be appointed by the PhD/DLA students
   d) the Head of the PhD/DLA Union (hereinafter DU) or, if the Head is unable to attend, a substitute member from the DU. The substitute member shall be appointed by the Head of the DSU.
   e) four external members on behalf of humanities, one external member on behalf of engineering sciences, three external members on behalf of medical sciences, two external members on behalf of social sciences, and four external members on behalf of natural sciences.

9. The representatives of the Doctoral Schools and the external members, referred to in the previous section in these Regulations, are elected for three years by the Rector, in agreement with the Senate, on recommendation by the Deans of the relevant Faculties and their scientific councils. Concurrently, using the above-mentioned method, the members referred to in subsection a), c) and e) shall be joined by a substitute member.
who shall have the rights of a full member in the UDC if the non-substitute member is unable to attend. All appointments may be extended.

10. The UDC has a quorum if most of its members, including at least two external members, are present.

11. The UDC shall make sovereign decisions in academic issues thus any appeal against the UDC’s decision shall only be formed on the grounds of breach of the doctoral regulations or breach of procedure. The UDC shall have the authority in all issues regarding the fundamentals of the doctoral training programme and the awarding of the doctoral degree. The UDC shall judge all issues on a University level. Through these measures, taking the qualities of the scientific disciplines into consideration, the UDC ensures that there is harmony in the demands regarding the standards of the training programme and the awarding of the doctoral degrees. By standard procedure, the UDC shall not manage personal issues as these are outside the scope of the awarding and revoking procedures of doctoral degrees. Such personal issues belong to the DDC. Appeals against the decisions of the Doctoral Schools, should those decisions breach the Doctoral Regulations, shall be submitted to the UDC. Appeals against the UDC’s decisions shall be addressed to the Rector of the University.

12. The UDC

- shall express an opinion on proposals to establish a new doctoral school;
- shall provide the Senate with a regular assessment of the doctoral training and the process of acquiring the degree at the university;
- shall initiate the dissolution of the doctoral school if warranted;
- may establish as per branches of science – in academic disciplines or fields of art as determined in the doctoral regulations of the higher education institution – disciplinary or arts doctoral councils;
- shall determine the conferring, nostrification and revocation of doctoral awards;
- shall provide the Senate with an opinion on proposals to the Rector to award the titles of Honorary Doctor or Honorary Doctor and Professor and on the dissolution of a doctoral school;
- shall elect the core members of the doctoral school of the higher education institution and appoint or dismiss members of the doctoral school.

13. In addition to the matters described in the previous section, the UDC shall be vested with authority in the following:

- the distribution of the number of admission quotas available – within each academic discipline – for doctoral candidates with Hungarian state scholarship,
- fundamentals in quality assurance at the Doctoral Schools.
14. The UDC shall approve
   • and appoint, on recommendation of the Head of the relevant Doctoral School, the core
     members of the Doctoral Schools,
   • the initiation of the foundation procedure of a Doctoral School.
15. The UDC shall make recommendations in the following matters:
   • recommending the Senate regarding the distribution and allocation of finances. These
     financial means are the conditions of operation of the doctoral training programmes. It
     is especially important to reserve the doctoral training normative funding and that sum
     of the scientific normative funding that is reserved to improve the quality of the doctoral
     training programme and the doctoral degree awarding procedure,
   • awarding the honorary doctor (Doctor Honoris Causa) title,
   • approval to award a doctoral degree with honours (Promotio sub auspiciis praesidentis
     Rei Publicae).
16. The UDC forms an opinion:
   • on the professor proposed to become the Chair of the UDC.
17. The UDC makes its decisions in light of the opinion of the DDC.
18. If warranted, the DDCs may make a decision by electronic voting. Electronic voting shall
    not be valid if one DDC member with the right to vote opposes the use of the electronic
    system.
19. Electronic voting shall not be used to make decisions in the following matters:
   • proposals to award doctoral degrees,
   • proposals to award the distinguished title of doctor honoris causa,
   • on the distribution of the state normative funding, received to organise training
     programmes, between the Doctoral Schools.

   **DISCIPLINARY DOCTORAL COUNCILS**

20. Taking the relevant Dean’s or Deans’, if more than one Faculty is involved, recommendation into consideration, the Chairs and members of the DDCs shall be
    mandated by the Vice-Rector for Research Affairs. The decision of the Vice-Rector for
    Research Affairs shall also reflect the standpoint of the scientific councils in the
    Faculties and the relevant Doctoral Schools. The mandate is for three years. In the DDC
    all accredited branches of science within the academic disciplines shall be represented
    by at least one member and by two members at the most; including substitute members
    (there shall be the same number of members for every branch of science). The secretary
    of the DDC shall be the Vice-Dean for Research and Doctoral Affairs at a relevant
    Faculty.
21. To those members who are either external or elected by the PhD/DLA students, Sections 8
    and 9 in Chapter III in these Regulations apply and shall be followed.
22. Following the recommendation of the Doctoral School Councils that operate in the
    academic disciplines, the DDC shall make decisions in the following matters:
   • jurisdiction conferred upon by the UDC
     o initiating the procedures to obtain a doctoral degree
     o defining the subjects at the PhD/DLA students’ comprehensive examination
     o selecting the members of the Comprehensive Examination Board, the Thesis
       Defence Committee and the persons who shall be the official Assessors
     o selecting the members of the Admissions Board at the Doctoral Schools
     o recognising credit points
     o determining the list of languages that shall be recognised as the first foreign language
       (first language examination) as per the foreign language requirements relating to the
       doctoral degree
   • taking the admission quotas – as defined by the UDC – into consideration, the DDC
     shall decide on the admission into the organised doctoral training programme and on
     the distribution of Hungarian state scholarship quotas between the Doctoral Schools,
• taking the Doctoral School councils’ recommendation into account, the DDC shall allow for a change – initiated by the PhD/DLA students – in the person of the thesis supervisor, and shall determine the appointment of a new supervisor,
• taking the Doctoral School councils’ recommendation into account, the DDC shall propose to select new core members to the already accredited Doctoral Schools,
• the DDC may decide to establish training and research programmes in the Doctoral Schools and – in pursuant of Sections 40 and 41 of Chapter III – on the programmes director’s person,
• in view of the cases described in Section 45 of Chapter VI in these Regulations, the DDC shall determine a closed assessment (defence) procedure and impose restrictions on both the thesis and on how it is made public,

23. Upon recommendation by the Doctoral School councils, the DDCs shall authorize the following:
• the doctoral topic supervisors
• the training and research programmes that shall be announced at any given time
• in line with the directives defined by the UDC, the DDC shall authorize a quality assurance system at the Doctoral Schools within each academic disciplines,
• the Chairs and members of the Admission Boards

24. Taking the Doctoral School councils’ opinion into consideration, the DDCs shall make recommendation in the following matters:
• awarding the doctoral degree,
• in all matters in which these Regulations shall give the right for the UDC to make a decision or make a recommendation,
• recommendations may be made to the Faculty Councils on how to distribute the doctoral training and research normative funding between the Doctoral Schools,

25. If warranted, the DDCs may make a decision by electronic voting. Electronic voting shall not be valid if one DDC member with the right to vote opposes the use of the electronic system.

26. Electronic voting shall not be used to make decisions in the following matters:
• proposals to award doctoral degrees,
• proposals to award the distinguished title of doctor honoris causa,
• on the distribution of the state normative funding, received to organise training programmes, between the Doctoral Schools,
• on admissions to the organised training programme,
• decisions on closed thesis defence procedures.

27. The legal remedy procedure described in Section 11 of this chapter as relevant to the UDC, shall also apply to the DDCs. The difference shall be that the official appeals relating to the DDCs are decided by the UDC – taking the relevant Dean’s opinion into consideration.

THE DOCTORAL INSTITUTE

28. All organisational and administrative tasks related to the procedure to obtain a doctoral degree and the doctoral training programme are carried out by the University’s Doctoral Institute. The Doctoral Institute shall be managed by the Vice-Rector for Research Affairs or a director appointed by the Rector.

29. Tasks of the Doctoral Institute:
• to carry out every paper-based and electronic administrative duty at the University that is related to the entire procedure to obtain a doctoral degree and the entire doctoral training programme. The administration shall keep a record of the state-funded doctoral vacancies, coordinate the procedure to fill temporarily vacancies and track changes in methods of financing,
• to maintain and, as necessary, upgrade the administrative recording systems,
to set up the doctoral candidate status and register applications after acceptance by the DDC,

to grant state scholarships with the cooperation of the University’s Directorate of Finance and Engineering,

to administer matters related to programme’s tuition fees,

to provide information to the relevant Ministry, the HAC, the Hungarian Doctoral Council (hereinafter HDC) and the Doctoral Schools,

to keep contact with the organisations that protect the interest of the PhD/DLA students,

to perform PR activities including the announcement of training and admission opportunities and the offering of courses for PhD/DLA students who may be in separate institutes,

to harmonize and update those pages on the University’s website that inform about the doctoral training programme

to synchronize, in line with the needs and wants, the organised training programmes run by each Doctoral School,

to register the organised doctoral training applications,

to arrange UDC meetings and coordinate the work of the DDCs,

to ensure – following a successful defence of the thesis – that the thesis and its abstracts are made public electronically in Hungarian and in the foreign language predetermined by the Doctoral School. The PhD/DLA student shall assist with the procedure,

to apply the provisions of Section 22 of the Doctoral Council decision as the thesis and the abstracts are made public in the above-mentioned way,

30. The central administrative tasks of the Doctoral Institute shall be managed by the Administration Management and Service Centre, working in cooperation with the relevant Faculties.

31. The Doctoral School of the relevant Faculty shall organise and run the public debate for the doctoral thesis. Three weeks before a defence of a thesis, the Doctoral Schools shall announce the event on the Hungarian Doctoral Council website (www.doktori.hu).

32. With the coordination of the Doctoral Institute, the administrators at the Dean’s Office (Student Secretariat) at the relevant Doctoral School shall manage the study-related tasks of those students who take part in the doctoral training. Such tasks include the following: student enrolment, managing course record books, registering studies-related requests, recording active/non-active student status, etc.

THE DOCTORAL SCHOOLS

33. In those academic disciplines and branches of science that are accredited by the HAS, the University offers organised doctoral training programmes. Taking the outcome of the programme, or the outcome of the individual preparation, into consideration, the University awards the highest academic degree: PhD or DLA. The doctoral degree acknowledges high understanding of a specific academic field, the ability to come to new scientific conclusions and the competence to carry out an independent study.

34. The training and research frameworks of the organised doctoral programme are the Doctoral Schools. With the approval of the DDC, the Doctoral Schools may initiate that a Doctoral School should run training and research programmes. The launch and termination of such programmes shall be reported to the UDC.

THE CONDITIONS FOR ESTABLISHING DOCTORAL SCHOOLS AND THEIR CODE OF PRACTICE
35. Tenders submitted to establish a Doctoral School shall be devised pursuant to the legal framework stipulated in the preamble to the current part (on Doctoral Schools) of these Regulations.

36. The Head of the Doctoral School shall be a professor with a HAS Doctoral title (Doctor of Science) and a core member. The Head of the Doctoral School, on recommendation by the UDC, taking the professional opinion of the HAC into consideration and following the approval of the Senate, shall be appointed by the Rector. The appointment is terminated if the Head of the Doctoral School resigns or his full-time employment ceases to exist. The Head of the Doctoral School shall have the following duties:
   • to take responsibility for the successful coordination of the establishment procedure of the Doctoral School;
   • to manage responsibly the work of the Doctoral School Council and responsibly execute the Council’s decisions;
   • to coordinate the professional work and to take responsibly for the quality of the work;
   • to represent the Doctoral School;
   • to run the administrative duties at the Doctoral School and to exchange information with the relevant Doctoral Councils;
   • to supervise the financial matters at the Doctoral Schools.

37. The Head of the Doctoral School shall appoint a secretary who shall manage the Doctoral School’s administrative tasks and complete the database coordination tasks in the doktori.hu database.

38. If a core member of a Doctoral School acts as a supervisor or trainer in another Doctoral School, he shall report this fact to the Council of his own school.

**TRAINING/RESEARCH PROGRAMMES**

39. Within the branch of science that appears in the School’s founding document, the Doctoral Schools may launch training and research programmes. A necessary pre-requisite to launch a programme is that – apart from the programme director – three additional members of the teaching staff shall participate in the programme. The scope of the legal authority and the duties of each training and research programme – programmes run in the Doctoral School – shall be governed by the operational regulations of the Doctoral School. Following the recommendation of the Doctoral School, the DDC shall decide to launch a training and research programme. The Doctoral Schools of the University are listed in Appendix 2.

40. The training and research programmes director shall only be a supervisor with a core member status at the relevant Doctoral School. In justified cases, following an authorization by the UDC, this rule may be disregarded. Following the proposal of the Doctoral School and the approval of the DDC, the training and research programmes director shall be appointed by the Chair of the DDC. The appointment is terminated if the programme director resigns, his contractual status ceases to exist or if he is discharged as a result of a decision made by the DDC.

41. The training and research programmes director shall have the following duties:
   • to manage the scientific work at the programme
   • to take part in the work of the Doctoral Council responsibly

**THE COUNCIL OF THE DOCTORAL SCHOOL**

42. At the Doctoral School, the professional work is managed by the Head of the Doctoral School and the body of the Doctoral School Council that shall have at least three members. The Chair of the Doctoral School Council shall be the Head of the Doctoral School while members of the Council shall be elected by the core members of the
Doctoral School and appointed by the DDCs. The directors of the training and research programmes, if they are not elected members, shall take part in the meetings as invited participants. One or more PhD/DLA students with consultation rights may be members of the Doctoral School Council. The Doctoral School Council may appoint a secretary who shall have voting and consultations rights at the meetings – in line with the resolutions of the Council. The secretary of the Doctoral School Council shall assist the work of the Head of the Doctoral School in completing the administrative work at the Doctoral School. The duties of the secretary are determined by the Head of the Doctoral School.

43. Tasks of the Doctoral School Council are as follows:

- to devise – in line with the doctoral Regulations – the internal regulations and academic requirements of the Doctoral School and the execution of these regulations and requirements;
- to supply the PhD/DLA students with all the infrastructural and academic/scientific necessities that the students may need during their training and research activities;
- to determine the framework of the organised training programme and make recommendations to the announcement of training sessions;
- to set up and regularly update the website – following the HAC requirements – of the Doctoral School;
- to agree to the training programme and research topic of PhD/DLA students, who participate in the organised training programme; to coordinate the training programmes and research topics; to oversee the activities of the thesis supervisors.
- to manage, in line with the valid financial management regulations of the University, the normative research funds available for the Doctoral School;
- to fulfil all administrative and registration related duties at the Doctoral School;
- to make recommendations on the members of the Comprehensive Examination Board and the Assessment Board, and on the comprehensive examination subjects for those candidates who aim to obtain a doctoral degree;
- to initiate change in the person acting as the Head of the Doctoral School and the persons acting as training and research programmes directors and make recommendations to the DDC as regards these matters;
- to initiate change in the teaching staff of the Doctoral School;
- to initiate all necessary changes in the title and content of the Doctoral School’s training and research programmes;
- to initiate the launch of new training and research programmes;
- to propose to the DDC that, if justified, students shall be removed from the doctoral programme;
- to inform all relevant bodies about the Council’s decisions in matters described in these Doctoral Regulations. If the decision is not challenged by these bodies, the decision shall be considered confirmed by the relevant bodies;
- to name all those foreign languages that are recognised by the Doctoral School during the procedure to obtain a doctoral degree;
- to make recommendations regarding the setup of the doctoral admissions committee.

44. The Doctoral School Council may transfer, in line with the Council’s rules of procedure, some of its duties to the DDC or to authorities within the School that runs the training
and research programmes. The Doctoral School Council’s higher board of appeal is the DDC.

CHAPTER IV
THE ORGANISED DOCTORAL TRAINING PROGRAMME

NHEA Section 16
(1) the doctoral training which prepares for the award of the doctoral degree following the Master’s degree is part of the programme. It shall be required to obtain at least two hundred and forty credits in the doctoral programmes. The training shall take eight semesters unless it is otherwise stipulated by that Law.
(2) That particular higher education institution may become eligible to offer a doctoral programme which already operates a Master’s programme in the related branch of science.
(3) The higher education institution shall be authorized to provide doctoral programmes and confer doctoral degrees in the given branch of science, or more specifically in disciplines or fields of Art, for which it has been granted the operating licence. The higher education institution can earn the right to provide a PhD training preparing students for a scientific degree, or a DLA training leading to a ‘Doctor of Liberal Arts’ degree in art education (hereinafter ‘doctoral programme’), and to confer such degrees.
(4) The scientific degree certified by the diploma awarded for the completion of the doctoral programme is ‘Doctor of Philosophy’ (abbreviation: PhD), or in art education ‘Doctor of Liberal Arts’ (abbreviation: DLA). The diploma shall be signed by the Rector and the Chair of the doctoral council.
(5) The doctoral council of the higher education institution shall have the right to organise doctoral programmes and award a doctoral degree (hereinafter ‘doctoral procedure’). The doctoral council of the institution may set up doctoral councils by branches of science as per academic disciplines or branches of art as specified in the doctoral regulations of the higher education institution. All members of the doctoral council – except for PhD / DLA students - shall hold a scientific degree.

1. The organised training programme enables the candidates to acquire the standard of knowledge and to complete the research practice necessary to obtain the doctoral degree. To fulfill the above-mentioned requirements, relying on the framework of an optional training programme, the candidates shall take part in an organised academic training module and learn foreign languages. Furthermore, the candidates may use the University’s sports facilities. At the relevant department, clinic or research institute, with the guidance of supervisors, the participants shall carry out individual research work. At any given time, one supervisor shall not oversee more than three PhD/DLA students. When justified, an exception from the rule may be granted by the DDC. One supervisor shall not be assigned more than three PhD/DLA students at any given time. An exception to this rule shall be made by the DDC in justified cases.

2. At the University’s Foreign Language Centre, for the duration of three semesters, state funded PhD/DLA students are entitled – free of charge – to four foreign language lessons per week. The students may take advantage of this language course – twelve lessons per week – in a study plan other than the above-mentioned plan. Credits shall not be granted for foreign language lessons.

3. The forty-eight-month-long doctoral training programme consists of eight examination periods. Each period lasts for five months and is in line with the undivided Bachelor’s and Master’s training programmes at the relevant Faculty. The training programme consists of a four-semester training and research period and following that a four-semester research and dissertation period. A complex examination shall be taken at the end of the training and research period as a condition of the research and dissertation period.
4. At the beginning of their doctoral studies, students who are admitted to the organised training programme (PhD/DLA students), shall enrol at the Doctoral School at the relevant Faculty. The student shall be issued a student card. From the available subjects, in the first two weeks of their examination period, the students shall enter in their course record book and Electronic Study System those subjects that are required by the Doctoral School Council as core subjects for the semester representative of the student’s own choice. Students shall make sure to enter those subjects that are recommended by their supervisors. The entries shall be signed and confirmed by the supervisor. Unless otherwise decided, the Doctoral School may decide to use a course record book and the entries shall be documented. Examinations are graded in the following way: the academic examinations shall be graded by the examiner; the research work shall be graded by the supervisor; credits for publications, considering the opinion of the supervisor, shall be granted by the training and research programme directors; and credits for teaching work shall be verified by the head of the relevant Faculty. These entries shall also be recorded in the course record book. This shall be recognised by the Dean of the relevant Faculty parallel with the countersignature of the Head of the Doctoral School.

5. In a given examination period, state funded PhD/DLA students shall only receive their scholarship funds if the student had fulfilled the accumulative credit point requirements in the preceding examination periods. The relevant accumulative credit point requirements are displayed in Appendix 4. If a student fails to fulfil these obligations, he shall continue his studies as a fee-paying student until he fulfils the credit point obligations. Regulations governing the Doctoral Training Programme and Awarding of the Doctoral degree – University of Szeged.

6. After every second examination period, the PhD/DLA students shall write a brief report to the Doctoral School Council. In the report, the students shall assess their academic performance. The supervisors shall give their evaluation on the report and it shall be signed by the programme director and countersigned by the supervisor.

7. Relying on the academic guidance of the DDCs, the doctoral training programme is organised by the Doctoral School Councils. Administrative assistance is given by the Doctoral Institute and the Student Secretariat at the Faculties. It shall be the task of the Doctoral Institute to coordinate the training programmes of the various Doctoral Schools. Together with the Student Secretariat at the Faculties, the Doctoral Institute shall ensure that the programmes are announced, the study-related tasks are managed and the semesters are closed.

8. Organised doctoral training shall be possible on a full-time basis and through correspondence training. Full-time training is supported by state scholarship or it is self-financed. Correspondence training is only possible in a self-financed way.

9. Employed people are eligible to obtain a doctoral degree in correspondence training. Requirements for admission, the training period, and the obtaining of the doctoral degree are the same as those for full-time training. However, education and research in correspondence and full-time training differ.

10. The decision to launch a correspondence training is made by the Doctoral Council within their scope of powers.

11. In pursuant of the stipulations in Appendix 4, each Doctoral School shall determine the requirements necessary to obtain a completion of studies certificate and fulfil the credit point demands of each examination period. 240 credit points shall be acquired within the doctoral training period.

12. The candidate’s performance shall be measured by the announced examination type: examinations, report sessions or a specialization thesis. The grading of the examination shall be on a 3-level or 5-level grading scale.

13. The candidate shall retake failed subjects only once. If the retake is unsuccessful, the credit points shall be acquired from another subject.
14. The Doctoral School Council shall decide whether to recognise the subjects and written performances completed by the PhD/DLA student in another university or on a study tour abroad.

15. Taking the outcome of a dialogue between the PhD/DLA students, their supervisors and the programme director into consideration, the specific topic of the dissertations shall be approved by the Doctoral School Council. The date of this approval shall not occur later than the end of the fourth examination period.

16. After a successful completion of the necessary credits, the PhD/DLA students shall obtain a completion of studies certificate. This certifies that the student has fulfilled all his doctoral training-related duties.

**ADMISSIONS INTO THE DOCTORAL TRAINING PROGRAMME**

17. By listing each academic disciplines and Doctoral Schools, admission opportunities to take part in an organised doctoral training programme, shall be announced annually by the Doctoral Institute. The announcement shall be made on the University’s website and in the doctoral programme admissions periodical. The Doctoral Institute, or the relevant DDCs, shall forward the admissions announcement, or parts of it, to partner universities and research institutes; to all institutes recommended by the Doctoral Schools. It shall be the joint duty of the Chairs of the DDCs, the Vice-Deans of the relevant Faculties and the Doctoral Institute’s director to organise and manage the admission examinations.

18. Applications for research projects shall be accepted by supervisors with the exception that the applicant wishes to join an individual doctoral training. Research projects approved by the Doctoral Council and the date is one month prior to submission.

19. Taking the Doctoral School Councils’ recommendations into consideration, or 5-6 undivided training, the admission requirements shall be determined by the DDC's. These requirements may include the following: training background of the candidate, his knowledge of languages and his previous academic achievements.

20. Applications for research projects shall be accepted by supervisors or by filling out the specific forms provided by the Doctoral Schools. To be eligible to apply one shall be a university student completing his final year in a Masters programme, a student in the fifth or sixth year studying in an undivided training programme or anyone with a university diploma and a language examination as required by the Law. The application forms – with appendixes – shall be submitted to the Doctoral Institute.

21. Application procedure fees are found in Appendix 3. The fees shall not be less than the flat rate fee of the BA training application procedure in the same academic discipline.

22. Applicants who inspire to join a Doctoral School shall take part in an admission test procedure administered by a committee that shall have at least three-members. Upon recommendation by the Doctoral School Council, the committee shall be appointed by the DDC. The aim of the test is to assess the candidate’s academic knowledge and intellect, find out about his ideas as regards his future doctoral work, explore what his previous academic work had been and test his knowledge on foreign languages. The committee shall evaluate the applicants’ performance and set up an order to decide whether to support an applicant or not. Testing foreign students, if warranted, may take place by means of a video conference.

*NHEA Section 40*

(6) Prospective students that have obtained a degree and qualifications in a Master’s programme and have at least passed one intermediate level Type “C” state language examination – intermediate (B2 level) general language examination certificate – or any equivalent language examination shall be accepted to doctoral programmes.
23. Relying on the approved fundamentals of the UDC, and with the consent of the Doctoral Schools, the evaluation method used at the admission test procedure shall be set by the DDCs. The contents of the admission test shall be determined by the Doctoral School Councils and made available for the candidates at least two weeks prior to the admission test procedure. The evaluation method used at the admission test shall also be made public by the DDCs on the Doctoral School’s website.

24. Based on the scores given, the Doctoral School’s admissions committee and the Doctoral School Council shall put the applicants in order. In line with the quotas set by the relevant Ministry and the UDC, decisions on admission shall be made by the DDC. The outcome of the decision shall be submitted to the UDC for approval. Admission results shall be valid for a particular Doctoral School only. There shall be no appeal against the decision and only a breach of Law case shall give grounds to complaints. Such complaints shall be addressed to the Rector of the University.

25. Foreign citizens shall also take part in the organised doctoral training programme. Any Doctoral School at the University may announce and run a doctoral programme in a foreign language. Citizens of the EU and citizens across the border shall have the same rights in this field as Hungarian citizens.

26. PhD/DLA students with no state scholarships may be admitted to the organised training programme by the University, but at the training programme’s admission procedure the same standards shall apply to all applicants.

27. At the University, decisions on admissions and the name of those persons who are admitted to the doctoral training programmes shall be made open to all enquiries.

STUDENT STATUS

28. PhD/DLA students may receive state scholarships or funds from other sources: research institute grants, tenders or corporate grants.

29. In line with its relevant general rules of procedure, the University shall make certain that all PhD/DLA students receive the social benefits they are entitled to by the Government Decree.

30. Taking the opinion of PhD/DLA students’ representative into consideration, the criteria for the allocation of the amount of government subsidy on textbooks and lecture notes –amount granted by the Government Decree and the annual budget – are determined by the UDC. The allocation of the funds may be different according to academic disciplines. It shall be the responsibility of the Doctoral Institute and the Student Services to transfer the subsidy funds to the PhD/DLA students and oversee the allocation of these funds.

NHEA Section 81

(1) Services available to students participating in (partial) Hungarian state scholarship supported studies shall be as follows:

a) registration on two occasions for lectures, seminars, consultations, practical courses, and field practice courses, recitals and examinations, the retake on one occasion of failed recitals and examinations, and the taking of the final examination that are requisite to the fulfilment of academic requirements specified in the educational programme and to the conferral of the certificate or diploma and the doctoral pre-degree certificate, as well as the degree award procedure during student status in accordance with the provisions of Section 53 (2),

b) study circle courses,

c) use of the facilities, including library and basic library services, laboratories, computer, sporting and recreational facilities, and the equipment of the higher education institution in connection with free-of-charge services,

d) in the case of higher-education vocational training, work and protective equipment (protective clothing) and sanitary accessories supplied for practical training, and in the case of other types of studies, protective equipment (protective clothing) and sanitary accessories,

e) student consulting,
f) the first issuance of all documents relating to studies and to the conferral of the doctoral degree.

(2) Unless otherwise provided for by the relevant laws, no higher education institution may charge any administrative service fees (e.g. enrolment fee) to students on (partial) Hungarian state scholarship supported studies.

(3) If a student participating in a (partial) Hungarian state scholarship supported studies also participates in studies in another EEA State, where his or her studies may be recognised by the Hungarian higher education institution, the student, for the period of the studies abroad and according to Subsection (4), may receive a scholarship from the higher education institution he or she is a student of.

(4) The student shall be entitled to the scholarship mentioned in Subsection (3), if he or she commenced the studies abroad with the consent of the higher education institution.

(5) The grant specified in subsection (3) may be provided on the account of the training aid. The grants shall be decided on and awarded subject to public applications.

31. Following the recommendation of the Doctoral School Councils, tuition fees, which may be different in each Doctoral School, are set by the DDCs. The period for paying the tuition fee is 12 months throughout the year. Information on the amount of the tuition fee, the manner in which it is allocated and the deadline for payment in each semester are found in Appendix 3.

NHEA Section 44

(1) The student may work under a student employment contract:
   a) within the programme, during professional practice (internship) or practical training at the institution organised as part of the training, at the business organisation formed by the institution or at an off-site place for practice,
   b) at the higher education institution but not directly corresponding to the training, or at a business organisation formed by the higher education institution.

(2) The employment of students working under a student employment contract shall be subject to the provisions of the Labour Code as appropriate. The Government in the course of defining rules pertaining to student employment contracts may establish more favourable terms for students than those laid down in the Labour Code.

(3) The student
   a) shall be entitled to payment in case of subsection (1)a), and in case of at least a six-week long continuous practice, which shall amount to at least fifteen percent of the minimum wage per week, such payment shall be provided by the place of professional practice in default of any agreement to the contrary,
   b) the working hours of the doctoral student - including the work pursuant to paragraph a) – may not exceed fifty percent of full time employment as per week per semester;
   c) the work schedule of the doctoral student shall be defined in such a way so as to enable such student to prepare for and take examinations as required,
   d) the amount of the monthly salary, in case of employment complying with fifty percent of full time employment, shall not be less than the lowest statutory wage (minimum wage), in case of employment for a shorter duration such amount shall be considered pro rata temporis.

32. With the consent of the Head of the relevant Doctoral School, Faculties may assign teaching, research or other Faculty-related tasks to the PhD/DLA students participating in the organised training programme. The assigned duties shall be written down. The written agreement shall be validated by the director of the relevant training programme. The formal requirements of the agreement shall be stipulated in the regulations of the University’s Directorate of Finance and Engineering.

33. In pursuant of NHEA Section 44 (5) (a), the PhD/DLA students may be obliged to complete 35 hours of work per month. This equals to approximately 8 hours per week.

34. The above-mentioned workload equals to completing a 4 hour practical session per week. With seminars and lectures that require preparation at a higher level, the number of sessions may be adequately lower.

35. The remuneration of the PhD/DLA students shall always be determined in line with the relevant Government Decree in effect that regulates the guaranteed minimum wage. When
calculating the minimum wage paid for a session, the following shall be taken into consideration: the full minimum wage shall only be payable if the PhD/DLA student has 26 sessions per month; 6 sessions per week in average.

36. No remuneration shall be paid for the obligatory work stipulated in NHEA Section 44 (5) (a).

37. The aim of the doctoral programme is to provide further academic training and to prepare the students for obtaining the doctoral degree. Doctoral state scholarships represent full-time employment status. Because of this, and to perform all research activities on time and on the highest possible professional level, it shall not be authorized for the students, covering the duration of their scholarship/grant status, to establish or uphold employment status or work-contract relationships outside the University or in partner institutes participating in the doctoral training. With the consent of the supervisor, an exception to the above-mentioned rule shall be granted only by the DDC. An exception to the rule shall enable the PhD/DLA student to complete extra duties in the area of research and teaching, and establish employment status necessary to perform these duties. Such duties shall not obstruct the professional progress of the student.

38. If a PhD/DLA student is granted an exception to the rule, his professional progress and fulfilment of all his study-related duties, shall be certified by the supervisor and evaluated in every semester by the DDC. Concurrently, the DDC shall decide on the extension of the exception permission.

39. If a student establishes employment status or a work-contract relationship without the DDC’s written permission, or if a student establishes such status or relationship for reasons other than what he has permission for, the DDC may file a disciplinary procedure against him.

40. PhD/DLA students fulfil their duties usually at the University, in partner institutes participating in the doctoral training or at foreign universities that cooperate with the Doctoral School, with the University or with the research institutes. In some cases the DDC may grant exception from the above-mentioned rule, but the majority of the PhD/DLA students – admitted to a particular Doctoral School – shall complete their research work at a department, institute or clinic at the University.

41. If a PhD/DLA student fulfils his research-related duties in an institute participating in the doctoral training, the University, upon consent from the Doctoral School Council, may compensate the institute in full or in part for the material costs of the training.

42. Following each examination period, PhD/DLA students shall be entitled to a resting period for at least three weeks. Following every second examination period, PhD/DLA students shall be entitled to a resting period for a further two weeks.

NHEA Section 45
(1) The student’s status shall be interrupted if the student declares that they do not intend to fulfil student obligations during the next semester, or fails to register for the next semester. The total combined duration of the period over which the student may interrupt their studies may not exceed two semesters. Students may suspend their status several times, in accordance with specifications stipulated in the course and examination regulation.

(2) Pursuant to the request of the student, the institution may equally authorise the suspension of student enrolment
a) for a combined period exceeding the duration set out under Paragraph (1), or
b) if relevant provisions have not been defined in this regard in the institution’s regulation on condition that the student is unable to fulfil obligations ensuing from their student status for reasons beyond their control, because of child-birth, an accident or illness, or other unforeseen reason.

(3) The student’s status shall be suspended if the student has been barred from continuing their studies after a disciplinary penalty was imposed against the student.

43. The University shall allow the interruption of studies for three times at the most and for three years at the most (non-active academic years). For the first time, the request to interrupt
the studies shall be granted. For the period of student status interruption state scholarship shall not be granted.

44. PhD/DLA students who return to continue their studies after postponing or leaving out an academic year – or interrupting their studies in any other ways – shall be entitled to funds that are stipulated in the Act in effect. These students shall pay a tuition fee as stipulated in these Regulations. Exceptions to the rule may apply as these Regulations indicate it.

45. To leave out an academic year, the student shall need an authorization from the relevant Vice-Deans along with the consent of the Head of the Doctoral School. The Doctoral School shall be informed about the matter.

NHEA Section 59 (1) The student status shall be terminated
a) if the student has been transferred to another higher education institution, on the day of such transfer,
b) if the student announces the termination of his/her student status, on the day such announcement is made, 
c) if the may not continue his/her studies is training supported by (partial) state scholarship, and does not wish to transfer to self-financed training,
d) on the last day of the first final examination period following the given study cycle, or in the case of postgraduate specialist programmes and higher education vocational training, on the last day of the first final examination period following the last term, or on the last day of the term of the doctorate programme, 
e) as regards higher-education vocational training, in the event the student becomes medically unfit to continue his/her studies, and the higher education institution cannot offer any other suitable higher education vocational training programme, or the student does not wish to continue his/her studies, or the conditions necessary for the pursuance of further studies cannot be met, on the day the decision on termination becomes final, 
f) in the event the rector terminates his/her student status – after giving warning to no avail and after reviewing the social condition of the student – because the student is in arrears with payment, on the day the decision on termination becomes final, 
g) on the day the disciplinary decision on expulsion becomes final,
h) a condition stipulated in this Act required to establish a student status is no longer met, on the day the corresponding decision on termination becomes final.

(2) The student status of students participating in Bachelor programmes shall not be terminated under point d) of paragraph (1), if they are admitted to a Master’s programme for the semester following the semester they completed their Bachelor studies.

(3) By means of a unilateral declaration, the higher education institution may terminate the student status of the student, who 

a) does not fulfil his/her academic obligations stipulated in the academic and examination regulations or the curriculum, 
b) has not registered for the subsequent semester on the third consecutive occasion, 
c) does not commence his/her studies after the temporary termination of student status, provided, in each case specified above, that the student has been reminded in writing to fulfil his/her obligations within the specified deadline, and has been informed of the consequences of default.

(4) By means of a unilateral declaration, the higher education institution may terminate the student status of the student, of whom the number of unsuccessful retake examinations and repeated retake examinations for the same unit reaches five.

46. The PhD/DLA student status shall terminate

a) if the 36 months training period stipulated in the above-mentioned Act is exceeded, 
b) if the student is expelled as a result of a disciplinary action in accordance with the Disciplinary and Compensatory Damages Regulations, 
c) if the PhD/DLA student is released from the programme, 
d) if the PhD/DLA student announces that he leaves the programme, 
e) if the PhD/DLA student is deleted from the list of students.

47. With the termination of his student status, the PhD/DLA student shall be dismissed from the organised doctoral training programme and his doctoral training shall be declared closed: 
a) if the PhD/DLA student requests his dismissal, 
b) if the PhD/DLA student requests that he shall be dismissed for the following reasons:
   I. the PhD/DLA student’s performance was not satisfactory at a retake of a core non-substitutable subject 
   II. the proposed research topic – the workload agreed to be completed within a deadline – is not completed because of the PhD/DLA student’s failure.
III. the proposed research plan has not been carried out within the required period of time due to a failure in the student’s work.

48. Taking the recommendation of the Head of the Doctoral School into consideration, dismissal cases stipulated in 34.2 (b) are judged by the DDC.

49. If the PhD/DLA student submits a leniency application, the UDC may decide to waive the right to impose the provisions stipulated in Section 34.2 (b). This shall only occur once during the studies of the student.

50. The Association of Hungarian PhD and DLA Students and the University’s PhD/DLA Students Union shall protect the interests of the PhD/DLA students.

CHAPTER V

COMPREHENSIVE EXAMINATION

1. As the close of the training and research phase of the programme and a prerequisite for commencing the research and dissertation phase, a comprehensive examination shall be taken, which measures and assesses the candidate’s study and research progress.

2. Requirements to be eligible to take the comprehensive examination include the acquisition of at least 90 credits within the training and research phase of the doctoral programme (first four semesters) and the acquisition of all the ‘training credits’ prescribed by the training scheme of the doctoral school (except for candidates who prepare for the acquisition of the doctoral degree on their own, whose student status is established as of registration for the comprehensive examination and the acceptance of this registration).

3. The comprehensive examination shall be taken publicly before an examination board. The examination board shall consist of a minimum of three members. It shall be ensured that at least one third of the board members are not employed at the higher education institution operating the doctoral school. Only a competent university professor or researcher with the title of Professor Emeritus or Doctor of the Hungarian Academy of Sciences may act as the chair of the examination board. All members of the board shall hold a scientific degree. The candidate’s supervisor shall not be a board member.

4. The comprehensive exam consists of two main parts: in the first part, the theoretical competence of the candidate is assessed (‘theoretical part’); in the second part, candidates shall demonstrate their scientific/arts progress (‘dissertational part’). In the theoretical part of the comprehensive examination, candidates shall take exams in at least two subjects / areas, with the list of subjects / areas included in the training scheme of the doctoral school. The theoretical exam may also involve a written part. In the second part of the comprehensive examination, candidates demonstrate their insight into the scholarly literature in a presentation, provide an account of their research results, and present their research plan for the second phase of the doctoral training and for the scheduling of the preparation of the doctoral thesis and of the publication of results.

5. The supervisor provides a written assessment of the examinee beforehand and / or assesses the examinee’s performance at the exam. When the examinee prepares for the exam independently, the board of the given doctoral school may call upon the assigned supervisor or one of the school’s teachers to prepare a preliminary assessment.

6. Members of the supervisory board assess the theoretical and dissertational parts of the exam separately on a scale of 0–5. The comprehensive exam is successful if the majority of the board members conclude that both parts are successful, they give at least 3 points to them and the average points total at least 3. The assessment of the comprehensive exam has two grades, pass or fail.
7. Minutes shall be taken, including a written evaluation of the candidate, at the comprehensive examination. The results of the exam shall be announced on the day of the oral examination. In the event of an unsuccessful theoretical part, the examinee may resit the exam on the failed subject(s) one more time in that particular examination period. In the event of an unsuccessful dissertational part, the examination may not be repeated in that particular examination period.

CHAPTER VI.
THE PROCEDURE TO OBTAIN A DOCTORAL DEGREE

NHEA Section 53 (1) The doctoral programme shall consist of course modules, research and reports adjusted to the unique character of the scientific discipline and needs of the candidate tutored individually or in a group. It consists of a training and research phase and a research and dissertation phase. At the end of the fourth semester, a comprehensive examination — evaluating academic and research achievement — shall be taken as a requirement for the completion of the training and research phase and the start of the research and dissertation phase.

(2) The doctoral degree may be obtained within the framework of a special doctoral procedure following the successful completion of the comprehensive examination and the research and dissertation phase.

(3) Individuals who prepare for the degree independently may also enrol in doctoral programmes providing that they have fulfilled the requirements for admission and for the doctoral programme. In this case, student status shall be established as of registration for the comprehensive examination and acceptance of this registration.

(4) The PhD/DLA student shall submit a doctoral thesis as defined in the Doctoral Regulations within a period of three years after passing the comprehensive examination. In cases covered by NHEA Section 45 (2) which deserve special appreciation, this period may be extended by up to one year in accordance with the Doctoral Regulations. In the course of the procedure to obtain a doctoral degree, the maximum length of the suspension of student status may not exceed two semesters.

(4a) The higher education institution shall issue a completion of studies certificate to the PhD/DLA student who has achieved the stipulated credit points during the doctoral programme.

(5) Requisites for obtaining a doctoral degree:
   a) Fulfilment of obligations prescribed in the Doctoral Regulations;
   b) Command of two foreign languages — with the option of having a non-Hungarian sign language accepted in the case of deaf PhD candidates — required to cultivate the scientific field, certified in accordance with the specifications stipulated in the Doctoral Regulations;
   c) Presentation of independent scientific work with articles, studies or through other means; the products of independent art work as a precondition for obtaining doctoral degrees in art (DLA);
   d) Independent implementation of the scientific or art activity measured against the requirements of the degree; presentation of a dissertation or work of art; defending achievements in a public debate.

(6) Doctoral degrees awarded shall be registered in a central database, to which Internet access shall be ensured. The doctoral regulation of the higher education institution shall define the detailed set of rules to be applied to the doctoral programme and the awarding of the title.

(7) Individuals holding PhD degrees shall be entitled to write “PhD” or the abbreviation “Dr” in front of their name, whilst holders of DLA degree shall be entitled to write “DLA” or the abbreviation “Dr” in front of their name.

NHEA Section 53/A (1) The doctoral degree and its abstracts shall be accessible to all. Public disclosure may be deferred up until the date of announcement of the patent or protection application. The higher education institution having awarded the degree shall provide for the full disclosure and record of the doctoral thesis and its abstracts both in printed and electronic format by lodging a printed and an electronic copy of each with the central library of the relevant higher education institution catalogued.

(2) The doctoral thesis and its abstracts shall be made accessible to all in an electronic format in the MTMT database by bearing an identifier (DOI) duly complying with and common to international practice.
1. After passing the comprehensive examination, the PhD/DLA student shall take part in and fulfil the requirements of the second phase of the doctoral programme i.e. the research and dissertation phase, which is part of the procedure to obtain a doctoral degree.

2. Individuals who prepared for the degree independently may also enrol in doctoral programmes providing that they have fulfilled the requirements for admission and for the doctoral programme. In this case, student status shall be established as of the registration for the comprehensive examination and acceptance of this registration. The decision to accept such a registration is made by the DDC based on the recommendation of the Doctoral School Council.

3. Upon acceptance of the registration for the comprehensive examination, the DDC, in line with the recommendation by the relevant Doctoral School Council, shall decide on the subjects of the comprehensive examination and appoint the members of the Comprehensive Examination Board.

4. The PhD/DLA student shall submit a doctoral thesis as defined in the Doctoral Regulations within a period of three years after passing the comprehensive examination. In cases covered by NHEA Section 45 (2) which deserve special attention, this period may be extended by up to one year in accordance with the Doctoral Regulations. In the course of the procedure to obtain a doctoral degree, the maximum length of the termination of the student status may not exceed two semesters.

5. The completion of studies certificate is a prerequisite for the submission of the doctoral dissertation. Upon submission of the dissertation, the DDC, in line with the recommendation of the relevant Doctoral School, shall appoint the members of the Committee of Assessors naming the two official opponents, an additional opponent and other members. During the appointment of the Committee, the general legal provisions for conflict of interest shall be taken into consideration. In addition to that, nobody who had cooperated with the PhD/DLA student on a publication shall take part in the work of the Committee.

6. If, by the deadline defined in NHEA Section 53 (4), the PhD/DLA student does not hand in a dissertation that is fit for assessment, and concurrently does not comply with the language examination and publication demands of the relevant Doctoral School, the procedure to obtain a doctoral degree shall be terminated by the relevant DDC on the grounds of insufficient completion of demands.

7. If the first procedure to obtain a doctoral degree is rejected because of a failed thesis defence or because there were two opponents who declined the dissertation, a renewal of the procedure to obtain a doctoral degree is only possible after two years and only once more within the same branch of science.

8. If the procedure to obtain a doctoral degree shall be terminated in accordance with Section 7 of the present chapter, an application for a new procedure to obtain a doctoral degree is only acceptable if the candidate, at the time of his application, submits his
dissertation – fulfils all other criteria – or meets the language examination and publication demands of the relevant Doctoral School.

9. If the PhD/DLA student cannot meet the deadline requirements of the procedure to obtain a doctoral degree because of childbirth, thus the procedure is terminated in accordance with Section 7 of the present chapter, it is not necessary to apply Section 40.7, but rather the second attempt shall be recognised as the first attempt.

10. Expenses of the procedure to obtain a doctoral degree and remuneration of those involved shall be found in Appendix 3.

11. In line with NHEA Section 81, if a doctoral candidate with Hungarian state scholarship submits a fully supplemented application to obtain a doctoral degree before the subsidizing period ends, all expenses incurred during the procedure to obtain a doctoral degree: commencement and certificate costs shall be covered by the relevant Doctoral School.

12. With PhD/DLA students who had previously obtained a completion of studies certificate in a state funded doctoral programme at the relevant Doctoral School, the Doctoral Schools may assume the fees incurred during the procedure to obtain a doctoral degree.

13. Minutes shall be taken at all stages of the doctoral procedure.

INDEPENDENT SCIENTIFIC WORK

14. The PhD/DLA student shall prove his independent scientific work by the following means: published articles in professionally approved journals and books (not more than half of these articles shall be labelled as to-be-published) and with patents that had been submitted and approved. Academic standards regarding the journals, the length and number of the articles, shall be determined by the Doctoral School Council and approved by the DDCs. The detailed requirements of each Doctoral School shall be found in the disciplinary regulations. These requirements may include demands from the area of scientometrics.

15. If the publications mentioned in the previous Section have co-authors, the co-authors shall declare in writing which specific scientific conclusions had been achieved through the candidate’s own efforts. Formal requirements regarding the declaration shall be found in Section 30 of the present chapter in these Regulations. The relevant Doctoral School Council may decide that the above-mentioned co-author declaration is to be issued by the lead author of the article.

16. If the co-author of any of the publications described in Section 15 of the present chapter is a PhD/DLA student, the supervisor shall declare whether the scientific conclusions published in the article demonstrate the contribution of the candidate.

FOREIGN LANGUAGE REQUIREMENTS

17. The number of active languages that shall be available for choice, and used for academic purposes, is regulated by the Law and shall be determined by the relevant DDC and the relevant Doctoral School Council. Without a specific ruling, only those languages shall be accepted in which scientific publications are written on a regular basis in the given branch of science. Out of these languages the competence in one may be compulsory. If, for the practice of a certain scientific branch of science, it becomes necessary to use an extinct language e.g. Latin, Ancient Greek, etc. then the use of these languages shall be regulated in detail in the relevant disciplinary regulations. Further special requirements shall also be available in the disciplinary regulations.
18. Intermediate language competence in at least one foreign language shall be certified by a complex type (oral and written) language examination or equivalent certification. Equivalence between language examinations is regulated by a Government Decree. Cases that are not regulated by the Government Decree fall under the authority of the University’s Foreign Language Centre. The expert opinion of the Centre shall be decisive.

19. The second language requirement shall be fulfilled in accordance with the disciplinary regulations of the relevant Doctoral School.

20. For foreign national PhD/DLA students whose native language is not Hungarian, their mother tongue shall be accepted as a fulfilment of one of the language requirements, provided that it satisfies the language requirements of the particular Doctoral School. For foreign nationals, Hungarian is administered as a foreign language.

THE DOCTORAL THESIS

21. The thesis is a comprehensive piece of work that demonstrates the candidate’s goals, his new academic achievements, his insights into the scientific literature and his research methodology. Generally, the thesis shall be written in Hungarian or in English, but following the decision of the relevant Doctoral School Council and being granted their exclusive permission, the thesis may be written in a language other than Hungarian, should this be scientifically reasonable. Foreign national candidates whose native language is not Hungarian may write their thesis in a language that is predetermined by the Doctoral School Council.

22. The inner title-page of the thesis shall display the following: author, thesis title, supervisor’s/adviser’s name (if there is a supervisor/adviser), place where the thesis was written (including the name of the Doctoral School, if the candidate took part in a doctoral training) and the date. The thesis includes a contents page, a summary in English (or in a foreign language required by the programme) and a bibliography. The thesis may be accompanied by an Appendix: photographs, collections of documents, etc. The length of the Appendix may be regulated by the DDCs.

23. The Doctoral School Council may decide to have an early disputation on a thesis before it gets its final shape. The circumstances of the disputation shall be set by the Doctoral School Council. The circumstances shall be recorded in a memo and the memo shall be attached to the minutes made during the disputation.

24. The thesis shall be submitted in four bound copies at the Faculty within the relevant branch of science.

25. Immediately following the submission of the bound copies, the PhD/DLA student shall ensure that the thesis and the abstracts are uploaded into the University Library’s Repository of Dissertations. The assessment procedure shall begin only after the upload has completed. When the defence of the thesis is announced, the relevant Faculty or Doctoral School uploads the names of the thesis defence board members into the Repository. The names of the thesis defence board members shall be displayed on the invitation for public disputation.

26. Following a successful thesis defence procedure – a fact to be recorded in the Repository – a printed copy of the thesis, which has the names of the thesis defence board members (a list to be added later), is catalogued in the University Library. All
other copies are returned to the candidate. Concurrently, the candidate shall upload the thesis and the abstracts into the MTMT database. If the defence is unsuccessful, the thesis, the abstracts and the names of the thesis defence board members shall be deleted from the Repository unless the candidate requests it in writing that the material shall be stored. Bound copies of the thesis are returned to the candidate except for one copy which remains in the Doctoral Institute.

27. If, in line with Section 22 of Chapter III in the Regulations, the thesis shall be made public at a later date, the operator of the Repository shall assure that until the date defined by the DDC, both the printed and the electronic versions of the thesis shall remain inaccessible.

28. The thesis shall be accompanied by the printed and electronic abstracts in Hungarian and English (or in a foreign language fit for the specific purposes of the given branch of science). It falls into the jurisdiction of the relevant Doctoral School to decide on a foreign language other than English. The number of copies of non-Hungarian abstracts and the format of the abstracts shall be determined by the Doctoral School Council. The number of Hungarian abstracts cannot be less than fifteen.

29. If the publications in the reference list have co-authors then three of the abstracts shall have a section where, regarding the specific research topic and the publications, the co-authors (or the lead author, if that is not the PhD/DLA student) shall declare in writing which specific scientific conclusions are the ones – from the co-authored scientific achievements – that were accomplished through the candidate’s absolutely vital work and later published in the thesis and in the abstracts. Co-authors shall also declare that the above-mentioned conclusions had not been used by them to obtain an academic degree and that they shall not make any attempt to obtain a degree relying on these conclusions in the future. The declaration shall be signed by the co-authors (or the lead author). The procedure to be followed in the case of foreign or deceased co-authors shall be stipulated in the regulations of the Doctoral School Councils. The above-mentioned declarations shall also include the declarations described in Section 17 of the present chapter in these Regulations.

THE ASSESSMENT PROCEDURE

30. The assessment procedure shall not begin until the candidate had met all the requirements: fulfilled all publications and language examination requirements. When the candidate meets all other requirements, his submission of his thesis to the Official Committee of Assessors shall not be rejected.

31. The Committee of Assessors that assesses the doctoral thesis consist of the following members: a Chair, two official assessors (one of them shall be an external professional) and two to four further members; five to seven members all together. Only persons with an academic degree are eligible to become members of the Committee. One Committee member shall be responsible for secretarial duties. One of the Assessors shall be an external professional. Sections 3 of Chapter V. in these Regulations shall apply to the Chair of the Committee.

32. In line with the proposal by the relevant Doctoral School Council, the Committee is assembled by the DDC. The decision of the DDC shall be in line with the Acts governing situations with conflicts of interest. The Chair and the two Assessors shall not be members of the same Faculty, research institute or members of the local research unit where the PhD/DLA student had completed his dissertation. The candidate shall not have a joint publication with any members of the Committee.
33. If the DDC is in disagreement with the Doctoral School’s proposal, the DDC shall ask the Doctoral School to reconsider, and makes its decision in light of the new and reviewed proposal. Within one week, the Doctoral School sends its new proposal on the members of the Committee to the DDC.

34. If one of the Assessors shall have a negative opinion, the DDC requests the opinion of a third Assessor. If the opinion of the third Assessor is positive, the DDC submits the thesis to public disputation. If the third Assessor rejects the thesis, the Doctoral Council terminates the procedure to obtain a doctoral degree. The same rules apply, when the two Assessors, appointed at the beginning of the disputation, reject the thesis. A new procedure is only possible after two years and only once more within the same research topic.

35. With two supportive assessments the DDC submits the thesis to public disputation within two academic months. Two weeks prior to the event, the place and time of the disputation shall be made public to allow enough time – minimum three weeks – for the members of the Committee to thoroughly study the thesis.

36. The list of those guests who shall receive a mandatory invitation to the disputation is regulated by the Doctoral School Councils. Along with the invitation, these guests shall also receive the abstracts.

37. The place and time of the disputation shall be announced at the relevant Faculty, department, research institutes involved in the programme and on the website of the Doctoral Institute and the University Library. Concurrently, one copy of the thesis and the abstract shall be submitted to the Library. Any additional invitations may be restricted by the academic disciplines. PhD/DLA students may send any number of invitations.

38. The disputation shall only be held in the presence of the Chair, at least one of the Assessors and at least four members of the Board. The disputation is not to be held if there is a negative opinion and the Assessor who gave the negative assessment is not present at the disputation. In such cases the DDC assigns a new date for the disputation.

39. The disputation is presided over by the Chair of the Board. The disputation begins with the administrator describing the candidate’s scientific resume.

40. At the public disputation, the PhD/DLA student presents (in an unrestricted way and in 30 minutes at the most) the abstract of his thesis and his work. The candidate presents the outcome of the assessments and reacts on the written questions of the Assessors and the questions and comments coming from the Committee members, the Assessors and those who are present at the disputation.

41. Following the closure of the disputation, the Committee – on a closed session and by secret voting – shall decide on a 0-5 level points grading scale whether the defence was successful or not. To be successful, the candidate shall reach at least 60% of all available marks. Following the session, the Chair shall publicly announce and justify the outcome.

42. The awarding of the doctoral degree shall depend on the report compiled by the Committee of Assessors and on the opinion of the Doctoral School Council that evaluates the marks given. The DDC shall form its opinion based on the final outcomes
and the UDC shall make its decision taking all the above-mentioned assessments into consideration.

43. Upon request by the PhD/DLA student, the University may issue a certificate on the outcome of the Assessment and the acquisition of the doctoral degree.

44. If the thesis demonstrates issues of applied research and development, the owner of the relevant patents – the financial sponsor of the applied research – may request, in line with the relevant Data Protection Laws, that a closed assessment procedure and thesis defence shall be held. Upon recommendation by the relevant Doctoral School, the DDC shall decide on such non-public disputations. Appeal against such decisions shall be submitted to the UDC.

45. If the above-mentioned case occurs, the regulations in the University’s Data Protection Regulations shall apply to safely store and provide access to the thesis.

QUALIFICATION OF THE DOCTORAL DIPLOMA AND CONFERMENT

46. The doctoral diploma shall display the following: the name and seal of the University of Szeged, the owner's identifiable name, the owner's place and date of birth, the qualification of the doctoral degree, the scientific branch of science, the place of issue and the day, month and year of obtaining the degree. The diploma is signed by the Rector, the Dean of the Doctoral School at the relevant Faculty and the Chair of the UDC.

47. Qualification of the doctoral degree shall be based on the defence of the thesis. Qualification of the degree shall be as follows: level 3.0-3.6 rite, level 3.61-4.30 cum laude, above level 4.30 summa cum laude.

48. The University shall issue the doctoral diploma in Hungarian and English. At the conferment ceremony, the candidate shall also receive an ornate copy of the diploma in Latin.

49. In line with the traditions of the University, those who were awarded a doctoral degree shall be conferred doctors at a public ceremonial University Council Meeting.

50. At the conferment ceremony, the candidates shall take an oath.

INDIVIDUAL PREPARATION TO OBTAIN A DOCTORAL DEGREE

51. Those who wish to obtain a doctoral degree within an individual preparation programme shall register for a comprehensive examination at a chosen Doctoral School. Taking the recommendation of the Doctoral School Council into consideration, acceptance of the applicant is decided by the DDC. A prerequisite for the statement of acceptance is the fact that the academic/scientific work of the applicant shall fit into the profile of the given Doctoral School and that the applicant shall demonstrate adequate previous academic/scientific work. On admission, the higher education institution shall recognise the minimum credits required for taking the comprehensive examination. Based on previously acquired skills and competencies, additional credits may also be recognised upon request.

52. The comprehensive examination following admission forms part of the first semester of the research and dissertation phase. The comprehensive examination shall be taken in the examination period following admission at the latest. If the PhD/DLA student does
not pass the comprehensive examination within the specified deadline, student status shall be terminated and the doctoral training shall end.

53. If a candidate preparing individually wishes to rely on the contribution of the University in the procedure to obtain a doctoral degree, the Doctoral School shall examine the relevant academic knowledge of the candidate before giving its consent. Candidates in the individual preparation programme are usually not assigned a supervisor, and the candidate’s research work is not carried out at the University. If a candidate in the individual preparation programme carries out his scientific research work at the University, the Doctoral School assigns a supervisor/adviser to the candidate.

54. Taking the recommendation of the Doctoral School Council into consideration, the amount of the fee – which depends on whether the PhD/DLA students who participate in the individual preparation programme shall need the assistance of a supervisor and wish to make use of the University’s infrastructure to carry out their scientific research – shall be determined by the DDC.

**JOINT DOCTORAL DEGREE (CO-TUTELLE)**

56. Thanks to bilateral agreements between universities, it is possible to obtain a joint doctoral degree working in conjunction with a foreign university. In each of these cases, the parties shall specify the conditions – consistent with the present Doctoral Regulations – in a written agreement.

57. In all the cases specified in the previous Section, the following shall be taken into consideration:

- the PhD/DLA student shall have one supervisor at each university;
- training time shall be divided between the two universities, and it cannot be less than two semesters at each university during the total training time;
- credits are recognised by the relevant Doctoral Schools;
- In selecting the members of the Comprehensive Examination Board and the Committee of Assessors, the lecturers and researchers at both universities enjoy the same rights to be elected as chairs and members. The composition of the committees shall be in accordance with applicable rules and guidelines at the institution where the disputation takes place;
- the committees shall include a member from both universities who can join the disputation via video conferencing if necessary;
- if the universities have different methods of assessment regarding the comprehensive examination and/or the thesis defence, the result shall be determined using both methods of calculation;
- with respect to the language used at the comprehensive examination, at the thesis defence, in the doctoral thesis and in its abstracts, Sections 22 and 29 of the present chapter shall apply;
- the comprehensive examination and the thesis defence can be organised at either of the cooperating universities;
- the publication requirements at both universities shall be fulfilled to obtain the doctoral degree;
- the doctoral diploma shall state that the degree is the result of joint supervision (co-tutelle).
THE REVOCATION OF THE DOCTORAL DEGREE

1. Throughout the doctoral procedure, the University follows and applies the principles and recommendations stipulated in the Code of Academic Ethics of the HAC and the position represented by the Committee on Science Ethics. It shall be acknowledged that the General Rules of State Administrative Procedures shall not apply, therefore, no decisions shall be disputed in a court or with any administrative bodies. Article X (2) of the Fundamental Law of Hungary states the following: “The State shall have no right to decide on questions of scientific truth; only scientists shall have the right to evaluate scientific research.”

2. The doctoral degree may be revoked if the bearer of the degree obtained it by presenting the intellectual property of others – partly of fully – as his own, used false or perhaps forged data in his thesis, used forged documents to launch and continue the doctoral procedure thus deceived and continuously deceived the body or person responsible for the management of doctoral matters. The procedure to revoke the doctoral degree shall only be possible, if the bearer of the award is still alive at the launch of the revocation procedure.

3. The deeds described in the previous section shall not have a statute of limitation. Only the bearer of the award shall be made responsible.

4. The doctoral degree may also be revoked in those proven cases when the bearer of the award shall turn out to be unbecoming of the doctoral title because of his conduct. Such cases are the following in particular:
   - serious misdeed in the person’s scientific work
   - criminal activity committed in the framework of a professional scientific work
   - deliberate violation of the doctoral oath

   The deeds described in this section shall not have a statute of limitation.

5. Anyone who can prove with documents or assumes that the deeds described in Sections 2 or 4 of this chapter had been committed may initiate the doctoral degree revocation procedure at the Chair of the UDC that issued the degree.

6. The UDC shall decide on the revocation of a doctoral degree. The revocation procedure is put forward by the Chair of the UDC who shall call for a judgment from the Doctoral School Council within the relevant branch of science to decide whether the terms stipulated in Section 2 of this chapter factually apply to the bearer of the award. During the doctoral degree revocation procedure, experts may be commissioned and the person who is the subject of the procedure shall also be heard. If the person who is the subject of the procedure shall not appear at the hearing – having been sent several legitimate prior notices – or requests not to have to take part in the hearing, the UDC shall have the right to make a legitimate decision without a hearing procedure. If the revocation procedure was initiated by the original author and the violation of intellectual property rights had been confirmed in a legally binding judgement prior to the launch of the revocation procedure, the UDC shall not launch an investigation, but refer to the legally binding judgement as sufficient proof for the revocation of the degree.

7. In case of an appeal against the judgement to revoke the degree, the UDC appoints an ad hoc committee with core members from the Doctoral School. At least 50% of these members shall not have an employment status with the higher institution that revokes the degree. Taking the standpoint of the ad hoc committee into consideration, the appeal shall be judged by the Senate.

8. The doctoral degree that was revoked by the UDC shall not be obtained in another doctoral procedure.

9. The legally binding revocation decision shall be made public by the University.

CHAPTER VIII
HONOURS AND AWARDS

THE CONFERMENT OF DOCTOR WITH HONOURS
NHEA Section 52

(8) The Rector of the higher education institution – subject to the prior consent of the President of the Republic – shall confer the doctoral degree with ‘Promotio sub auspiciis praesidentis Rei Publicae’ honours upon the student whose educational performance was always highly acknowledged during his/her studies in secondary school, higher education and at the doctoral level, provided that he/she also demonstrated outstanding performance in the procedure leading to the award of a doctoral degree. The detailed conditions of receiving a doctoral degree with honours shall be defined by the Government.

1. Suitable candidates shall initiate the conferment of the title of Doctor with Honours in a written proposal submitted to the Doctoral Institute. The Doctoral Institute shall forward the proposal to the relevant DDC for opinion, which opinion shall be forwarded by the Doctoral Institute to the UDC. Taking the opinion of the UDC into consideration, the Senate shall decide whether to be in favour of the proposal. Through the relevant Ministry, the Rector shall submit the proposal to the President of Hungary.

PRO LAUDANDA PROMOTIONE AWARD

2. The award may be granted to persons who have obtained a PhD degree at the University of Szeged after organised training and who have completed all the requirements at the highest standard of quality. Another condition is that the defence shall take place within five years after studies have commenced, and the date on which the degree is conferred shall be in the year in which the award is granted or within the preceding four calendar years.

3. Up to six awards may be granted annually.

4. The recipient of the award shall receive a certificate and a medal. The award involves a one-time cash benefit determined by the Senate, which amounts to three times the amount of the current minimum wage.

5. The award shall be signed by the Rector of the University and the President of the University Doctoral Council.

6. The conferring of the award shall be decided by the University Doctoral Council on the basis of the recommendation of the Disciplinary Doctoral Council.

7. The expenses related to the preparation of the award and the medal shall be covered by the Doctoral Institute, and the cash benefit shall be provided by the University Excellence allocation.

8. The award ceremony shall be held once a year on University of Szeged Day.

THE DISTINGUISHED TITLE OF DOCTOR HONORIS CAUSA

9. The University may recognise the outstanding academic merits of Hungarian and foreign persons by awarding the ‘honorary doctor’ (Doctor Honoris Causa) title. The title shall not be awarded to the professors and emeritus professors of the University of Szeged.

10. The University shall confer the above-mentioned title to maximum 5 persons a year.

11. Conditions of awarding the Doctor Honoris Causa title:
- internationally highly-acclaimed academic/scientific work
- long-term continuous relationship with the University that had lead to internationally recognised shared academic/scientific conclusions
- by awarding the title the University strengthens its good reputation and respect

12. In exceptional and highly justifiable cases e.g. with highly renowned globally acclaimed persons: Nobel laureates or Honorary Doctorates at famous universities, when it serves the interests of the University, the academic requirements stipulated in the previous Section may not be followed. In such cases, the awarding of the title shall contribute significantly to the good
reputation of the University. Only the Rector of the University shall propose these exceptional cases. Considering the opinion of the UDC, the awarding of the title shall be decided – with qualified majority – by the Senate. Such proposals shall not fall under the scope of Section 10 of this chapter and more than one proposal shall not be accepted annually.

13. Councils of the Faculties with doctoral training programmes and the DDCs shall make recommendations to the UDC on the awarding of the Doctor Honoris Causa title.

14. The Senate of the University shall decide on the awarding of the Doctor Honoris Causa title. The decision shall be made in knowledge of the decision of the UDC.

15. The diploma of the distinguished title shall be written in Latin or in English. The awarded person shall receive the professors’ gown that is decorated with the colour of the respective Faculty.

16. The Doctor Honoris Causa diploma is signed by the Rector of the University, the Chair of the UDC and the Dean of the relevant Faculty.

17. The honorary doctoral awarding ceremony usually takes place during the public ceremonial University Council Meeting, which is held usually as part of the ceremonies on the University of Szeged Day.

18. Expenses related to the awarding procedure shall be divided fifty-fifty by the respective Faculty and the Rector’s Office.

THE DISTINGUISHED TITLE OF EMERITUS CORE MEMBER

19. On recommendation by the relevant Doctoral School, the DDC may award the distinguished title of Emeritus Core Member to the person:
   - who was a founding member or a core member for at least five years of the Doctoral School and
   - takes upon himself to stay in contact with the Doctoral School in the future

20. Emeritus Core Members have no supervisory duties and they shall not have to meet the HAC requirements.

21. The HAC’s evaluation procedure does not apply to the Emeritus Core Members and such Members shall not be added when fulfilling the minimal core member criteria. On the other hand, the academic/scientific achievements of the Emeritus Core Members shall still be registered in the statistics of the Doctoral School.

22. Upon suggestion by the Doctoral School, the Emeritus Core Member title may be revoked by the DDC, if the active relationship between the Doctoral School and the Emeritus Core Member ends or if the bearer of the title asks for the revocation. Following the revocation, the person shall no longer appear in the public database, but his academic/scientific achievements shall still be registered and added to the academic performance of the Doctoral School.

CHAPTER IX

DOCTORAL STUDENTS’ INSTITUTIONAL SCIENCE SCHOLARSHIP

1. The doctoral students’ institutional science scholarship is a single benefit for doctoral students at the University of Szeged who conduct successful scientific activities.

2. The doctoral students’ institutional science scholarship shall be awarded and payment made at most on one occasion in a reporting period and equal to a value of no more than HUF 250,000 on one occasion.

3. The doctoral students’ institutional science scholarship shall be awarded on the basis of a competition. The call for applications shall be published on the Doctoral Institute website.

4. The conditions for awarding the doctoral students’ institutional science scholarship shall be provided in the call for applications.

5. The applications shall be submitted to the relevant doctoral school. The council of the doctoral school shall rank the applications. The awarding of the scholarship shall be decided by the relevant disciplinary doctoral council.
6. The applications shall be assessed on the basis of the following categories and scores (a total of no more than 100 points may be obtained).

a) Scientific achievements, up to 50 points, consisting of the following:
   - scientific student prize winners
   - publications in the MTMT database (Database of Hungarian Scientific Works), or not yet in the database but accepted or submitted publications there,
   - Hungarian and international conference presentations / posters
   - patent approved
   - participation in scientific tenders
   - scientific awards and prizes for innovation

b) Scientific work plan, up to 35 points

c) Other activities, up to 15 points, including:
   - language certificate in the languages accepted by the respective Doctoral School, at a higher level than the requirements for the degree, or further state accredited language certificates at least B2 level
   - other activities or results considered important by the Doctoral School.

7. The Disciplinary Doctoral Councils shall determine the scores which may be given on the parts listed within the categories on the basis of the proposal from the Councils of the Doctoral Schools. The scoring system for the evaluation shall be made public at the time of the call for applications.

CHAPTER X
MISCELLANEOUS PROVISIONS

RECOGNITION OF THE CANDIDATE OF SCIENCES TITLE

NHEA Section 104
(7) (bb) with regard to the fulfillment of the employment and qualification requirements prescribed in this Act, in addition to the provisions of Section 105 (5), the higher education institution may declare in its statutes that doctoral degrees, Candidate of Sciences and Doctor of Science degrees acquired in a member state of the European Economic Area or the Organisation for Economic Cooperation and Development (OECD) are equivalent to scientific degrees.

NHEA Section 105
(5) Where a law stipulates a scientific degree as a precondition of employment or qualification, this shall be construed as a doctoral degree, Candidate of Sciences, Doctor of Science, or nostrified and recognised scientific degrees awarded abroad.

(6) Holders of the Candidate of Sciences degree shall be entitled to use the designation ‘doktori fokozat’ [doctoral degree].

1. On what is stipulated in the above-mentioned Act i.e. the legitimate use of a doctoral degree title, the University shall issue – upon request – a certificate. The certificate shall also be available in English.

NOSTRIFICATION OF ACADEMIC DEGREES OBTAINED ABROAD

2. The UDC may recognise an academic degree issued by foreign institution as a doctoral degree, if the requirements of obtaining the foreign academic degree already fulfil – or fulfil by meeting additional preset conditions – the requirements of obtaining a doctoral degree at the University. As regards the issues of fulfilment, the setting of applicable additional preset conditions and the nostrification of the degree, the DDT shall make recommendation – in light of the opinion of the relevant Doctoral School Council – to the UDC. Fees that may apply for the nostrification procedure shall be displayed in Appendix 3. The nostrified degree shall have no qualification. During the nostrification procedure the provisions of Act C of 2001 shall apply.
3. The Doctoral Regulations of the University – apart from those provisions that detail the particular requirements of each discipline and branch of science – shall be approved by the Senate. The particular requirements of each academic discipline regarding the organised doctoral training programme and the procedure to obtain a doctoral degree shall be found in the disciplinary regulations. Relevant sections that appear in the disciplinary regulations shall be found in the Appendixes of these Regulations. A copy of the Regulations shall be sent to the Ministry of Education and Culture and, for approval, to the Hungarian Accreditation Committee.

4. The following persons shall be recorded and administered: persons admitted to a Doctoral School, persons participating in the training programme, persons applied to obtain the award and persons who were awarded the doctoral degree.

5. The Doctoral Institute shall have the administrative duties and the tasks of forwarding information.

6. The Head of the Doctoral Institute and the Chair of the UDC shall regularly inform the Hungarian Accreditation Committee and the National Higher Education Information Centre (OFIK) – in line with the information needs of these institutions – on persons who obtained or were rejected a doctoral degree.

7. The Doctoral Institute, in pursuant of the higher-ranking rules of Law, shall register the first employment of PhD/DLA students who obtained a completion of studies certificate and, with their consent, the first employment of persons who obtained a doctoral degree.

CHAPTER XI

EXPLANATORY PROVISIONS AND DECISIONS CONCERNING PROCEDURE

1. If during the procedure to obtain a doctoral degree the deadlines are set in months, July and August shall be disregarded.

CHAPTER XII

IMPLEMENTATION PROVISIONS

1. These Regulations shall go into effect on December 1, 2016. The Regulations may be accessed continuously at the following link: http://www.u-szeged.hu/szabalyzatok. The provisions of the Regulations which entered into force on January 1, 2016, shall apply to PhD students and doctoral candidates who commenced their doctoral training or doctoral degree procedure before September 1, 2016.

2. The Organisational and Operational Regulations, which came into force on May 26, 2014, and the current text of the amendments to the present Regulations, which was closed on December 10, 2015, are contained in these Regulations in a unitary structure.

Szeged, November 28, 2016

Dr. Gábor Szabó
Rector

FEES AND CHARGES LEVIED DURING THE DOCTORAL TRAINING PROGRAMME AND THE PROCEDURE TO OBTAIN A DOCTORAL DEGREE AND THE ALLOCATION OF THESE MONIES

1. Tuition fees levied on PhD/DLA students who are either Hungarian nationals or nationals who – in pursuant of the Law – shall fall under the same provisions as Hungarian nationals: EU citizens or Hungarian nationals living outside Hungary, shall be HUF 500 000 per semester at the most. Fees for all other PhD/DLA students who are non-Hungarian citizens shall be EUR 4000 per semester at the most. The exact sum to be paid shall be specified by the relevant Doctoral School Council and approved by the DDC. All fees shall be proportionate with the actual costs of the training.

2. Upon failure to fulfil or late fulfilling of their duties stipulated in these Regulations, PhD/DLA students shall pay extra fees. The amount of the extra fee shall be maximum 1% of the PhD/DLA student annual normative funding as stipulated in the annual Act on the National Budget. With repeated violations and in any further cases a higher extra fee shall apply.

3. The admission fee shall be determined by the relevant Faculties, and it shall be made public before the admission procedure. The Doctoral Institute may accept late applications no later than five working days after the application deadline on payment of a surcharge announced before the admission procedure.

4. Fees applicable during the evaluation procedure to obtain a doctoral degree:
   a) The fee shall be HUF 110 000 for the following doctoral candidates: Hungarian nationals and nationals who – in pursuant of the Law – shall fall under the same provisions as Hungarian nationals and who had participated in an organised doctoral training at the University, PhD/DLA students employed by the University of Szeged, the Biological Research Centre (SZBK) and the Cereal Research Institute. For PhD/DLA students not mentioned above the fee shall be HUF 150 000.
   b) For foreign nationals, who take part in a paid doctoral training for at least one academic year (two semesters) at our University, the fee shall be EUR 500. In all other cases EUR 1000.
   c) The fee for the recognition of PhD degrees issued by foreign institutions shall be HUF 50 000. These charges do not include the cost of the investiture and the diploma other than those referred to in (b). If a higher level of procedural legislation provides for an exemption to the payment of procedural and diploma fees for the PhD/DLA student, the remaining costs shall be borne by the relevant doctoral school.

5. With the evaluation procedure to obtain a doctoral degree only the official Assessors shall be reimbursed for their work. (The reimbursement may include the costs of the relevant second class train ticket.) Those members of the Committee of Assessors, who are not from Szeged, may only be reimbursed for the costs of the relevant second class train ticket. Fees shall be allocated as follows:
6. Allocation of fees – paid by PhD/DLA – students in cases not outlined above:

All fees shall be allocated to the Doctoral Schools, but the respective Faculty Council may establish a reimbursement.

Appendix 4

MANAGING CREDIT POINTS IN THE DOCTORAL TRAINING PROGRAMME

1. During the doctoral training all learning outcomes shall be measured in credits (study credit points). Credits shall be granted for only those study activities that are graded on a 3-level or 5-level grading scale system.

2. During the 48-month-long training period – divided into 8 examination periods – a total of 240 credit points shall be earned to be eligible for a completion of studies certificate.

3. At least 20 and at most 45 credit points shall be collected during each examination period.

4. If a student participates in a partial study at a foreign or other Hungarian university, the relevant Doctoral School Council may grant exemption from the above-mentioned requirements. The credit point value of the courses that had been completed at a foreign or other Hungarian university shall be judged by the relevant Doctoral School Council.

5. With research work such as bibliography, library and archives research, follow-up on journal articles, conference participation – where the student presents a poster or holds a lecture – and publishing articles in journals a total of at least 130 credit points shall be achieved.

6. The credit point value of the theoretical course with two lessons per week (14 weeks/semester) shall be 3-6 points. The credit point value shall change in proportion with the change in the total number of lessons i.e. taking an intensive course with an external lecturer.

7. For the pre-degree certificate that states that all courses have been covered at least 15 credits points shall be achieved from the theoretical courses.

8. The credit point value of the weekly one lesson per week (for 14 weeks) practical session (seminar) shall be 1-2 credit points. With teaching activities 48 credit points shall be achieved at the most; 8 credit points per semester at the most. No credit points shall be granted for lessons that the PhD/DLA student is paid for.

9. Should the school set it as a requirement that, at certain intervals, during departmental or research group seminars, the PhD/DLA student shall give an account of his research activities then one such report may worth 3-5 credit points. It is recommended to require at least one such report.
(in the sixth examination period, for example). The Doctoral School Council shall determine the number of reports to be recognised with credit points.

10. PhD/DLA students may be granted credit points for journal articles and active conference participation with lectures and posters if they are published in the conference publications. The credit point value of the above-mentioned activities shall depend on the students’ level of contribution to the achieved outcomes. With the consent of the relevant Disciplinary Doctoral Council and Doctoral Council of the relevant Branch of Science, such credits shall be determined by the relevant Doctoral School Council.

GD Section 11 (2)
For medical residents and medical in-house practitioners—who are participating in a particular training programme to ensure the succession of academic tutors at medical higher education institutions—out of their completed core training modules and professional practice period, the relevant Credit Transfer Committee—in pursuant of the doctoral regulations—shall only permit the recognition of two semesters or sixty credit points.

11. With the consent of the relevant DDC, recognition of credit points—in pursuant of the Government Decree—shall be decided by the Doctoral School Council. Such recognition shall only be possible with PhD/DLA students in the organised training programme.

12. The credit points recognised on the basis of the previous section shall be confirmed by the head of the Doctoral School, and the acquisition of the training credit points shall be confirmed by the lecturer of the theoretical course. The Doctoral School Council shall determine the credit points to be confirmed by the head of the training/research programme. The supervisor shall be responsible for the confirmation of the remainder of the credit points.

13. Countersigned by the Chair of the DDC, the completion of each study period shall be certified by the Dean for Research Affairs at the Faculty in the relevant branch of science.
